

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Canceled)

Claim 2 (Canceled)

Claim 3 (Canceled)

Claim 4 (Canceled)

Claim 5 (Canceled)

Claim 6 (Canceled)

Claim 7 (Canceled)

C1
Claim 8 (Currently Amended): Electronic equipment having a wireless communication function, comprising:

a housing accommodating a circuit for wireless communication and an electronic circuit for operation different from wireless communication; and

a switch which controls ~~for controlling~~ the operation of said circuit for wireless communication independently of the operation of said electronic circuit.

2
Claim 9 (Original): Electronic equipment according to claim 8, wherein:

said housing comprises a body housing and a subhousing adapted to be opened and

closed with respect to said body housing;

said electronic equipment further comprising a keyboard provided on said body housing
in relation to said operation, and a display provided on said subhousing;

said switch being provided on a surface of said subhousing.

³
Claim ~~10~~ (Currently Amended): Electronic equipment according to claim ¹~~8~~, wherein:

said electronic equipment is operatively connected to a public line by said wireless
communication;

^{CI}
^{cut.} said electronic equipment further comprising an indicator which indicates ~~means for~~
indicating an electric field strength of electromagnetic waves related to said public line.

⁴
Claim ~~11~~ (Currently Amended): Electronic equipment according to claim ³~~10~~, wherein:

said switch has a transparent or translucent movable portion;

said indicator emits ~~indicating means comprising means for emitting~~ visible light through
said movable portion.

Claim 12 (Canceled)

Claim 13 (Canceled)

Claim 14 (Canceled)

Claim 15 (Original): Electronic equipment comprising:

a dielectric antenna having a surface formed with a conductor pattern having a predetermined shape;

a substrate having a first surface and a second surface, said dielectric antenna being mounted on said first surface; and

a coaxial connector mounted on said second surface of said substrate;

said substrate having a ground pattern between said dielectric antenna and said coaxial connector.

Claim 16 (Original): Electronic equipment according to claim 15, wherein:

01
cut.

said ground pattern comprises first and second ground patterns formed on said first and second surfaces of said substrate, respectively;

said first and second ground patterns being connected by a via extending through said substrate.

Claim 17 (Original): Electronic equipment according to claim 16, wherein:

said conductor pattern of said dielectric antenna comprises first and second conductor patterns;

said first conductor pattern being connected to said first ground pattern;

said coaxial connector comprising a signal terminal and a ground terminal;

said ground terminal being connected to said second ground pattern;
said second conductor pattern of said dielectric antenna and said signal terminal of said
coaxial connector being connected by a feeder pattern formed on said substrate.

Claim 18 (Original): Electronic equipment according to claim 16, further comprising:
a housing on which said substrate is mounted, said housing being formed of a conductor;
said second ground pattern of said substrate being connected to said housing.

Claim 19 (Canceled)

Claim 20 (Canceled)

Claim 21 (Canceled)

Claim 22 (Canceled)

Claim 23 (Currently Amended): An electronic ~~information processing~~ apparatus
comprising:

a communication circuit which transmits or receives ~~for transmitting or receiving~~ radio
wave signals;

an electrical circuit performing a function different from a function of the communication
circuit; and

a generating unit which generates ~~means for generating~~ a signal to turn off the

communication circuit, said generating unit means being operative outside of the electronic information processing apparatus, said communication circuit being turned off in accordance with the signal.

6
Claim ~~24~~ (Currently Amended): An electronic ~~information processing~~ apparatus according to claim ~~23~~, wherein said generating unit means includes a slide switch.

1
Claim ~~25~~ (Currently Amended): An electronic ~~information processing~~ apparatus according to claim ~~23~~, wherein said communication circuit includes an oscillator, and said communication circuit is turned off by turning off the oscillator.

C1
cut
8
Claim ~~26~~ (Currently Amended): An electronic ~~information processing~~ apparatus according to claim ~~23~~, wherein said electronic ~~information processing~~ apparatus further comprises a power supply circuit which supplies ~~for supplying~~ an electric power to said communication circuit, and said communication circuit is turned off by the operation of said power supply circuit.

9
Claim ~~27~~ (Currently Amended): An electronic ~~information processing~~ apparatus according to claim ~~23~~, wherein said electronic ~~information processing~~ apparatus is capable of connecting to a public line.

¹⁰
Claim ~~28~~ (Currently Amended): An electronic ~~information processing~~ apparatus
according to claim ~~27~~⁹, wherein said public line is an internet.

¹¹
Claim ~~29~~ (Currently Amended): An electronic ~~information processing~~ apparatus
according to claim ~~28~~⁵, wherein said electronic ~~information processing~~ apparatus is a mobile
terminal which is capable of transmitting and receiving an e-mail.

¹²
C1
cut.
Claim ~~30~~ (Currently Amended): An electronic ~~information processing~~ apparatus
comprising:
a communication circuit which transmits or receives ~~for transmitting and receiving~~ radio
wave signals;
an electrical circuit performing a function different from a function of the communication
circuit; and
a generating unit which generates ~~means for generating~~ a signal to turn off the
communication circuit, said communication circuit being turned off in accordance with the
signal.
